

BIM/VDC Engineer

Are you interested in joining one of the nation's premier electrical contractors? ERMCO is an Electrical and Systems contractor located in Indianapolis, Indiana and we are currently seeking an experienced **BIM/VDC Project Engineer** to join our team.

ERMCO was named the #1 Large Company in central Indiana's "Top Workplaces 2017" by the Indianapolis Star. Employees describe the company as family- and team-oriented with strong benefits and the opportunity to grow professionally. ERMCO strongly believes in a healthy work/life balance. We offer an extensive benefits package including competitive salary, an industry leading Paid Time Off (PTO) policy, Pay For Performance bonus plan, an Employee Stock Ownership Plan (ESOP), 401k with company match, and insurance (health, dental, vision, life, and disability).

General responsibilities of a BIM/VDC Project Engineer at ERMCO include:

- Modeling of electrical components, identifying conflicts, and working with the project team to facilitate a field installation deliverable.
- Development and management of prefabrication plans
- Creation of Robotic Total Station (RTS) layout files
- Development of electrical and systems contract documents for design-build opportunities

Applicants shall possess a working knowledge of:

- Revit, Navisworks, MS Excel, and BlueBeam
- National Electrical Code
- Electrical construction installation means and methods
- Construction processes (RFI, submittal, shop drawings, etc.)

Desired Skills and Experience:

- Self-motivated individual who takes pride in their work.
- Willingness to learn
- Strong organizational and analytical skills
- Ability to communicate effectively

If you would like an opportunity to become a member of the ERMCO team and engage in our ethical, professional, family friendly work environment, please apply!
